While I have had many different rolls in my work experience like Teachers assistant, bus driver, banquet server, bartender, plant technicians and deli clerk, they were all customer service oriented jobs where you had to provide excellent service.

After receiving my License practical nurse certification in 1990, I worked in many area rehab facilities, nursing homes and area Hospitals gaining valuable experience from cutting edge wound care state of the art orthopedic prosthetics. Because of my vast experience and versatility in my profession I began working as a traveling nurse providing staff relief threw out the capital district for 5 years. Due to family obligations I transitioned to private dutie hospice nursing where I increased quality of life for my patients and there families for the last 10 years.

I am currently changing careers, and I am enrolled in a Front End Web development program at Cancode of Albany. I plan to continue my education to include cybersecurity and azure cloud storage certification.

This position would be great for me as it is in my current career path in technology. I am flexible with my schedule and would like to be considered for this position.

Authorized to work in the US for any employer
